**There is no programme. Will this work? – Yes, experience says it does.**

A group people from SMEs and research institutions based in Brandenburg and Berlin has been meeting for the “Bioeconomy Round table” in an informal setting several times in 2018. Their common interest is the bioeconomy, e. g. the re-utilization of side streams from the food industry, development of smart bacteria for industrial purposes, sustainable forest management or the development of green packing solutions.

The meetings were organized by the cluster management teams at *Wirtschaftsförderung Brandenburg*, the regional economic development corporation for Brandenburg.

**Participants expressed the wish to have a German-Polish edition of the regional round table and we are looking forward to meeting colleagues from Poland and to engaging in lively talks and discussions. English shall be used as the common language.**
